

# Software-Hardware Mix and Match

Depending on your needs, you can run IEDScout, StationScout, and StationGuard on different hardware platforms. All software products shown below run on MBX1 and RBX1. IEDScout can be used additionally on a PC or notebook.

## Step 1: What do you want to do?

**IEDScout**  
Versatile software tool for working with IEC 61850 devices

**StationScout**  
Innovative testing solution for IEC 61850 substation automation systems; includes IEDScout

**StationGuard**  
Cybersecurity and functional monitoring system for the power grid

## Step 2: How do you want to use it?

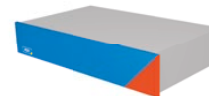

**PC**

**MBX1:** Mobile and powerful platform for cybersecure isolation of your PC from the SAS network

**RBX1:** Permanently installed, robust, high-performance 19-inch platform, tailor-made for the power grid

**VBX1:** Virtual machine platform for cybersecurity and testing applications

## Combination options at a glance

	PC	MBX1	RBX1	VBX1
IEDScout	■	■	■	■
StationScout		■	■	■
StationGuard*		■	■	■

\* Please note that StationGuard cannot be used together with other products on the same platform due to technical reasons.

# Ordering Information

Choose your software solution according to your field of application and flexibly combine it with your preferred hardware platform. Our software solutions and hardware platforms are perfectly harmonized to ensure smooth operation.

Software	Description
	<a href="#">IEDScout for PC</a>
	<a href="#">IEDScout for MBX1 or RBX1</a> Highly recommended for cyber-secure isolation of your PC from the SAS network
	<a href="#">StationScout Smart Overview License</a> For visualizing substations' data models and communication, includes IEDScout license
	<a href="#">StationScout Commissioning License</a> Includes Smart Overview License and dedicated features for testing and commissioning
	<a href="#">StationGuard</a> StationGuard, the functional security monitoring system for detecting cyber threats and malfunctions in the power grid. Requires additional service contract for security updates and new features

Platform	
	<a href="#">MBX1</a> Mobile platform
	<a href="#">RBX1-40</a> 19-inch platform with 100-240 V ( $\pm 10\%$ ) DC and AC supply
	<a href="#">RBX1-44</a> 19-inch platform with redundant 100-240 V ( $\pm 10\%$ ) DC and AC supply
	<a href="#">RBX1-20</a> 19-inch platform with 48-60 V ( $\pm 10\%$ ) DC supply
	<a href="#">RBX1-22</a> 19-inch platform with redundant 48-60 V ( $\pm 10\%$ ) DC supply
	<a href="#">VBX1 (upon request)</a> Virtual machine platform

Upgrades	
	<a href="#">Upgrade from IEDScout PC to IEDScout for MBX1 or RBX1</a>
	<a href="#">Upgrade from IEDScout MBX1 or RBX1 to StationScout Smart Overview</a>
	<a href="#">Upgrade from IEDScout MBX1 or RBX1 to StationScout Commissioning</a>
	<a href="#">Upgrade from StationScout Smart Overview to Commissioning</a>
